

HOUSE OF MAATRIKA

Heritage in every thread

"In the lanes of Varanasi - India, generations of artisans have been quietly perfecting a craft the world once paused to admire. No shortcuts. No noise. Just skill, passed down, thread by thread."

Website Design & Requirements Document

Project Version 1.0 | May 2026
Focus: Luxury Static Brand Presence

01. Visual Identity

The digital presence must reflect the "rare, untouched, and alive" nature of the Banarasi weave. The design language is **Minimalist Heritage**—combining classic elegance with modern whitespace.

Color Palette

Antique Gold: Accents, icons, and borders. Represents the Zari.

Deep Maroon: Primary text, headings, and branding elements.

Royal Red: Secondary buttons and highlight moments.

Forest Green: Deep backgrounds and footer accents.

Typography Strategy

Headings: A sophisticated Serif (e.g., *Playfair Display* or *Cormorant Garamond*). It should feel editorial, like a high-fashion magazine.

Body Copy: A clean, spacious Sans-Serif (e.g., *Montserrat* or *Lato*) at 11pt - 12pt for high readability across all devices.

Imagery Style

Large, high-resolution hero images. Focus on macro shots showing the texture of the "thread by thread" craft. Use of parallax scrolling to give a sense of depth and luxury.

02. Information Architecture

The website consists of 6 primary sections designed to guide the user from the "story" to the "product."

1. The Entrance (Home):

A cinematic full-screen hero. Minimal text. A "scrollytelling" experience that introduces the lanes of Varanasi. Transition effects that mimic the unfolding of silk.

2. The Narrative (Our Story):

Utilizing the brand manifesto. Highlighting the "No Shortcuts" philosophy. This page should feel like an open letter to the connoisseur of art.

3. The Pure Weave (Collections):

A static gallery. Since there is no backend, this will be an elegantly curated list of product cards with hover effects showing the "artisan detail."

4. The Craft (Process):

Educational section. Explaining why House of Maatrika doesn't do "mass" or "fast fashion." Includes a step-by-step visual guide of the hand-weaving process.

5. Heritage Rewards (Loyalty):

Visually representing the loyalty program: *"Get your 5th purchase at 50% off."* Clear, icon-based journey from the 1st to the 5th purchase.

6. The Atelier (Contact):

Minimalist contact form. WhatsApp click-to-chat integration (using +91-890 4799 757). Embedded Google Map for the Bengaluru location. Social QR codes styled to match the brand.

Navigation Menu

A "Sticky" or "Floating" header that becomes transparent on scroll. Social icons (Instagram, Facebook) should be integrated into the footer and the navigation bar.

03. Technical Requirements

As requested, this is a **Static Website** designed for performance, SEO, and visual fidelity.

Component	Recommendation
Framework	Tailwind CSS (for custom utility-first styling) or Bootstrap 5.
Animations	GSAP (GreenSock) for smooth, high-end scroll-triggered animations.
Asset Management	WebP format for images to ensure fast loading while maintaining quality.
Responsiveness	Mobile-first approach. Custom breakpoints for tablet and large desktops.
Interactivity	Vanilla JS for simple state management (Mobile menu, modal popups).

Interaction Design

- **Reveal on Scroll:** Content should fade/slide in as the user moves down the page.
- **Cursor Interaction:** A custom gold-circle cursor for desktop users to add a layer of premium feel.
- **Lazy Loading:** All high-res images of weaves must lazy load to prevent initial lag.

04. Content Strategy & Next Steps

The Copywriting Voice

The tone is **Sovereign, Calm, and Authoritative**. It avoids "salesy" language. Phrases like "Revive generational artistry" and "Unapologetically original" define the brand voice.

Implementation Roadmap:

1. **Wireframing:** Map the 6 sections on mobile/desktop.
2. **Asset Preparation:** High-res photography of sarees and weaver hands.
3. **Frontend Dev:** Build out the HTML/Tailwind structure.
4. **Animation Layer:** Integrate GSAP for the "Luxury Unfolding" effect.
5. **Optimization:** SEO meta tags for "Authentic Banarasi Sarees Bengaluru."
6. **Deployment:** Static hosting on Netlify, Vercel, or GitHub Pages.

"Because real luxury, It doesn't try hard. It just stays."
